Security Solution Services

Our focus on advisory-led services, investment in new SOC capabilities and commitment to delivering cutting-edge security services, ensures we stay ahead of the curve, providing you with solutions that are not only effective today but also scalable for tomorrow's challenges in APAC.

Capabilities

---

*1 - **Security Operations Centre***

An extensive range of capabilities, leveraging advanced tools such as Managed EDR, SIEM, Zero Trust network access (ZTNA), and cloud security solutions like CSPM and SASE.

*2 - **Digital Forensics and Incident Response***

Swiftly and effectively address security incidents, backed by expert risk forensics and comprehensive e-discovery capabilities to ensure thorough investigation and resolution.

*3 - **Security Testing***

Robust penetration testing, breach attack simulations, red team exercises, and specialised testing for web applications, networks, wireless security, along with baseline, vulnerability, and security design review.
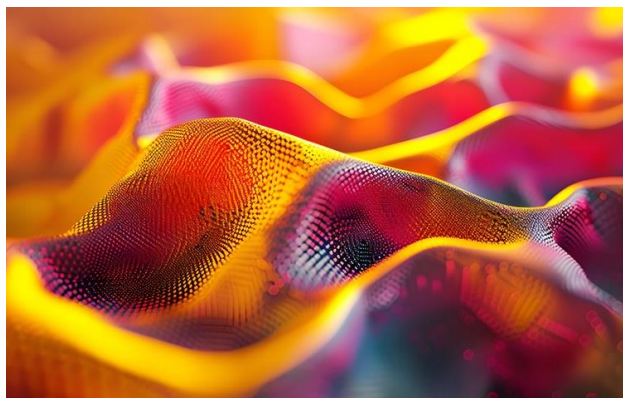

*4 - **Advisory and Assurance***

Comprehensive consulting services encompassing strategy and roadmap development, virtual CISO, information security management, ISO27001 audit preparedness, policy suite creation, supply chain reviews, gap assessments, audits, and systems accreditation.

*5 - **Assessments and Uplifts***

Evaluate and enhance your organisation's readiness across key security frameworks such as Essential Eight and Zero Trust, along with specialised assessments for technology risk ensuring your systems are accredited and aligned with industry best practices.

*6 - **Design, Deploy and Transition***

End-to-end solutions that include designing, deploying, and transitioning sophisticated security controls, as well as integrating security vendor systems to architect, procure, implement, maintain, and optimise your security infrastructure for robust protection.

Featured Solutions

- Introduce your primary goal or purpose.

- Be sure to state both what it is and what it isn't.

- Have conviction.

Supporting Evidence

- Reinforce your main point with facts.

- Embedded web content makes a great addition to this section.

- Have more information to share? Visit the Storyline and add content as you wish.

Conclusion

- Wrap up your presentation by reiterating your main argument.

- Describe concrete consequences and practical applications.
